

Eliza 2.0: Your virtual therapist, here to listen and support.

A Therapist Chatbot and An upgraded version of Eliza.

Introduction:- ElizaTherapy

Introducing Eliza 2.0, the groundbreaking chatbot therapist powered by IBM that offers a compassionate and personalized virtual therapy experience like never before.

Therapist chatbot

Eliza 2.0 is a chatbot specifically designed to provide therapy.

Made with IBM

Built using IBM technology for advanced features and capabilities.

Personalized therapy

Provides individualized therapy sessions based on user input.

AI-powered

Utilizes artificial intelligence algorithms for realistic and effective therapy sessions.

Role Of A Therapist

Diagnoses and treats mental health disorders. Creates individualized treatment plans according to patient needs and circumstances. Meets with patients regularly to provide counseling, treatment and adjust treatment plans as necessary. Conducts ongoing assessments of patient progress.

Personalized Therapy

With its deep understanding of user emotions and experiences, Eliza 2.0 offers highly personalized therapy sessions. It adapts its approach based on individual needs, providing tailored coping strategies and support. By analyzing user data and tracking progress over time, Eliza 2.0 helps users achieve better mental well-being and empowers them to take control of their therapy journey.

Advanced NLP

Powered by cutting-edge natural language processing (NLP) algorithms, Eliza 2.0 can comprehend and interpret user sentiments accurately. Through sentiment analysis, it identifies emotions such as anxiety, sadness, or happiness, tailoring its responses accordingly. By understanding the nuances of human language, Eliza 2.0 creates a more personalized and effective therapy experience.

Limited access to mental health resources.

Many people struggle to find affordable and accessible mental health services, resulting in unmet needs and worsening mental health conditions. Eliza 2.0 aims to bridge this gap by providing a virtual therapist that is available 24/7 and can offer support to those in need.

- **Lack of personalization**

The chatbot's responses may not feel tailored to the individual user's needs and emotions.

- **Limited understanding**

The chatbot may have difficulty comprehending complex or nuanced responses, leading to misunderstandings or incorrect advice.

- **Lack of empathy**

The chatbot may struggle to provide genuine empathy and emotional support, which is crucial in a therapist role.
